## INFLUENZA VACCINE MANAGING ABSENTEEISM IN THE WINTER MONTHS

The 2019 Vaccine covers 4 influenza strains and is a Quadrivalent vaccine with greater protection than a trivalent vaccine

### THE BENEFITS FOR WORK OF AN INFLUENZA VACCINATION PROGRAMME

- ✓ *Can you afford to have staff off work with influenza?*
- ✓ *Proactively managing lost time and absenteeism.*
- ✓ *We come to you and can help you schedule your vaccinations with minimal work disruption*

*Online booking available*

- Influenza can cause great disruption in the workplace, e.g. absenteeism or impaired employee performance from illness.
- Influenza is highly contagious and tends to occur in epidemics (i.e. spreads rapidly)
- Flu vaccines are given on a voluntary basis to staff
- Vaccinations are required annually to ensure protection and should be given prior to the winter months in March/April/May to provide effective cover for the risk period.
- There must be a qualified first aider available onsite when our nurse visits you.

**To order, please phone or email THIS FORM with your details to:**
